UC Center for Environmental Implications of Nanotechnology
Outreach Manager

The University of California Center for Environmental Implications of Nanotechnology (UC CEIN) employs a multidisciplinary approach to conduct research, knowledge acquisition, education and outreach to ensure the responsible use and safe implementation of nanotechnology in the environment. This National Science Foundation/Environmental Protection Agency funded Center is seeking an Outreach Manager to translate and disseminate the UC CEIN’s research, knowledge, and risk assessment expertise to the Center’s stakeholders, including the risk assessment community, regulatory community, policy makers, and industry. Major objectives of the position are:

- Lead the efforts to translate scientific knowledge generated by the Center for dissemination to our external stakeholders for use in nanosafety assessment, risk analysis and regulatory decision making. Includes developing white papers, coordinating workshops, and representing the UC CEIN through national travel to conferences and meetings.
- Develop and implement an external communications strategy for the Center
- Serve as the key point of contact with external stakeholders and liaison between stakeholders and Center researchers
- Coordinate synergies between the Center outreach program and Center’s public education programs.

Candidate must have at least a Master’s degree in a relevant field (Public Health, Public Policy, Nanotechnology/Environmental Science), possess experience in conducting risk translation, and ability to represent the UC CEIN to the scientific community, government, policy makers, and industry representatives.
